Education

Swami Vivekananda University

Bachelor of Technology in Computer Science and Engineering

Jul. 2024 – Jun. 2028

Barrackpore, West Bengal

Technical Skills

Languages: JavaScript, C/C++, Java

Backend: Node.js, Express.js

Familiar with: TypeScript

Developer Tools: Git, GitHub, Docker, Postman, Render, Vercel

Frontend: React, HTML, CSS, Tailwind CSS

Database: MySQL, MongoDB

Learning: Next.js

Projects

Github Profile Analyzer - Full Stack Project | *Next.js, TypeScript, Tailwind, Express.js, MySQL*

June 2026

- Developed a full-stack GitHub analytics platform that fetches and analyzes user profiles, followers, and language statistics using the GitHub API.
- Built a modern responsive frontend with Next.js, TypeScript, and Tailwind CSS, providing an intuitive interface for profile analysis and data visualization.
- Designed and implemented RESTful backend APIs using Node.js and Express.js to fetch GitHub data, process analytics, and store analyzed profiles in a MySQL database.
- Implemented efficient database operations with parameterized queries, duplicate record handling, and profile history tracking to ensure secure and scalable data management.

Student Task Manager API | *Node.js, Express, MongoDB*

December 2025

- Built a RESTful API to manage student tasks with full CRUD operations (create, read, update, delete).
- Implemented user authentication and authorization using secure login system (JWT-based).
- Implemented clean API structure following best practices for integration with AI-based assistant systems.
- Handled error management and API response formatting for consistent and scalable backend communication.

HealPlus — Smart India Hackathon (SIH) College-Level Project | *React, CSS, JavaScript, Git*

September 2025

- Contributed to a team project aimed at designing a healthcare solution for improving rural medical accessibility.
- Developed frontend interface using React with static JSON-based data handling.
- Built structured UI components for displaying patient-related information and service workflows.
- Collaborated with team members using GitHub for version control and task coordination during hackathon development.

ZapQuiz | *React, CSS, JavaScript*

June 2025

- Developed a responsive quiz web interface with structured pages for quiz flow, questions, and results using semantic HTML.
- Designed an interactive UI with clean layouts, modern styling, and consistent visual hierarchy for better user experience.
- Built reusable UI components such as buttons, cards, and quiz layouts to maintain design consistency across pages.

Achievements

- Participated in Smart India Hackathon (SIH) College-level round as a part of team project (HealPlus), contributing to frontend development and ui design.
- Solved 30+ Data Structures & Algorithms problems on Leetcode.
- Completed SQL Murder Mystery challenge using advanced SQL queries and relational database concepts.

Leadership Experience

- Led on-campus coordination for KASCADE, a quiz initiative by Indian Institute of Technology Kharagpur, including obtaining institutional approval, student outreach, event promotion and participation management.

Certification

• React Bootcamp — LetsUpgrade

February 2025

• Generative AI Mastermind — Outskill

December 2025
